

How to Upload Your Videos to YouTube

Uploading from a computer

Once you've successfully recorded your video (and edited it if you choose to) you need to upload it onto YouTube. Here's how:

1. Go to [YouTube](https://www.youtube.com)
2. Sign in using your Gmail/Google account.

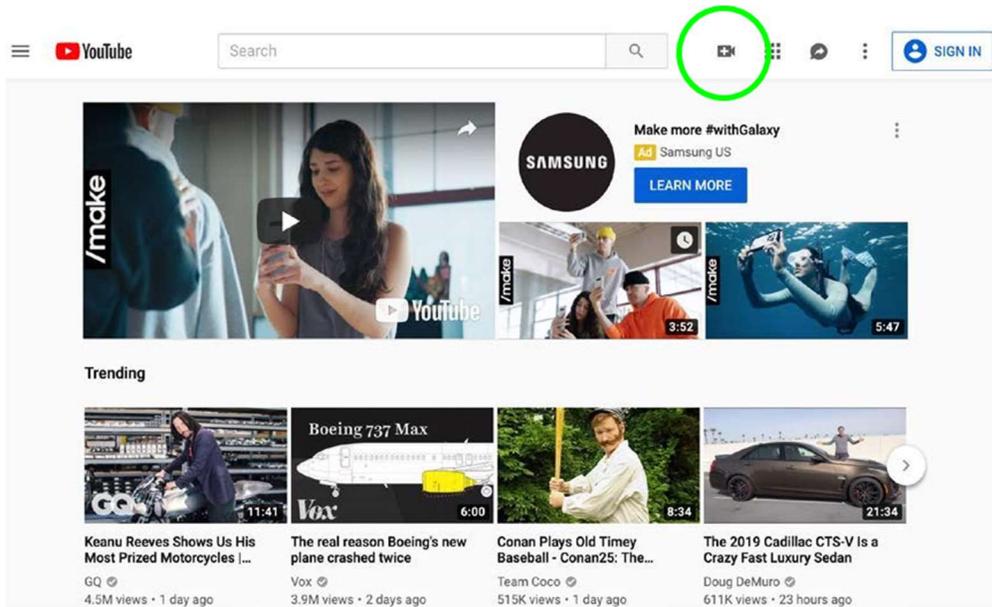

Or create a Google Account if you don't already have one. (Learn more about [age requirements on Google accounts](#) or [creating a Google account with a family link](#).)

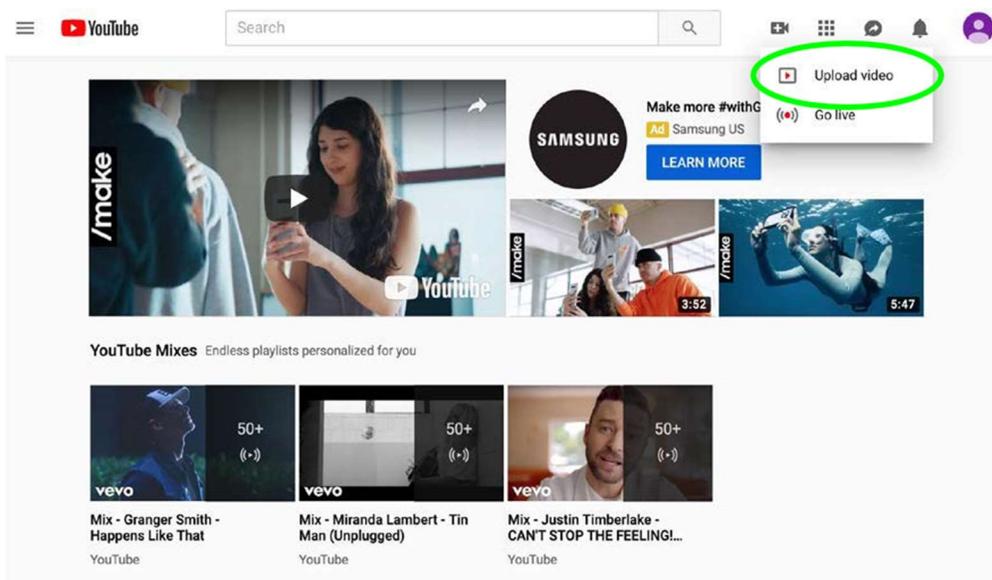

A screenshot of the Google Account creation page. The page has the Google logo at the top, followed by the heading 'Create your Google Account' and the subtext 'to continue to YouTube'. There are input fields for 'First name', 'Last name', and 'Your email address'. Below the email field, it says 'You'll need to confirm that this email belongs to you.' and provides a link 'Create a Gmail account instead'. There are also input fields for 'Password' and 'Confirm' with a strength indicator icon. At the bottom, there are two buttons: 'Sign in instead' and 'Next'. A note at the bottom left says 'Use 8 or more characters with a mix of letters, numbers & symbols'.

Note - If you've created a new account, you will need to verify your email address and then sign in.

3. At the top of the YouTube page, click “Upload” (the video camera icon).

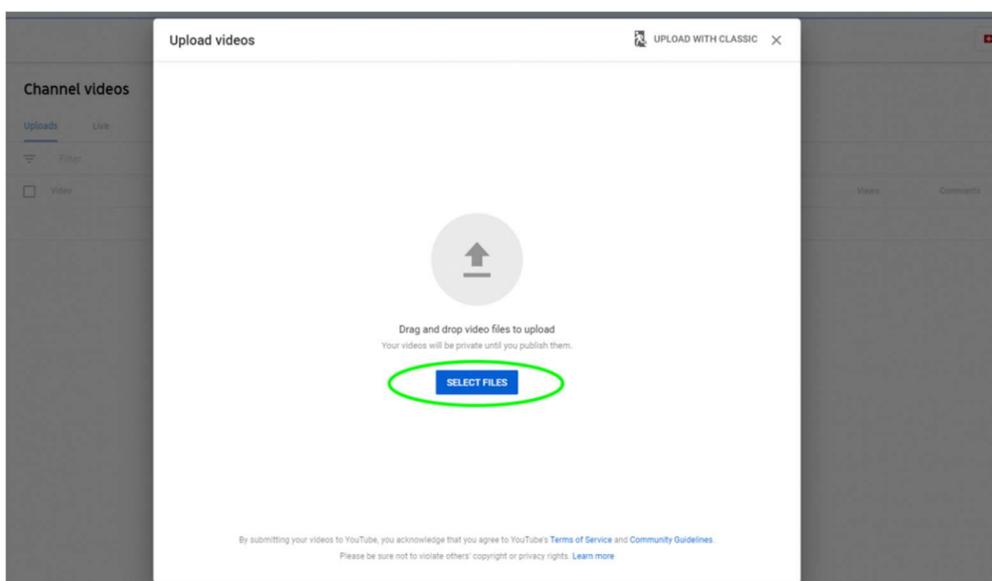

4. Select “Upload video”.

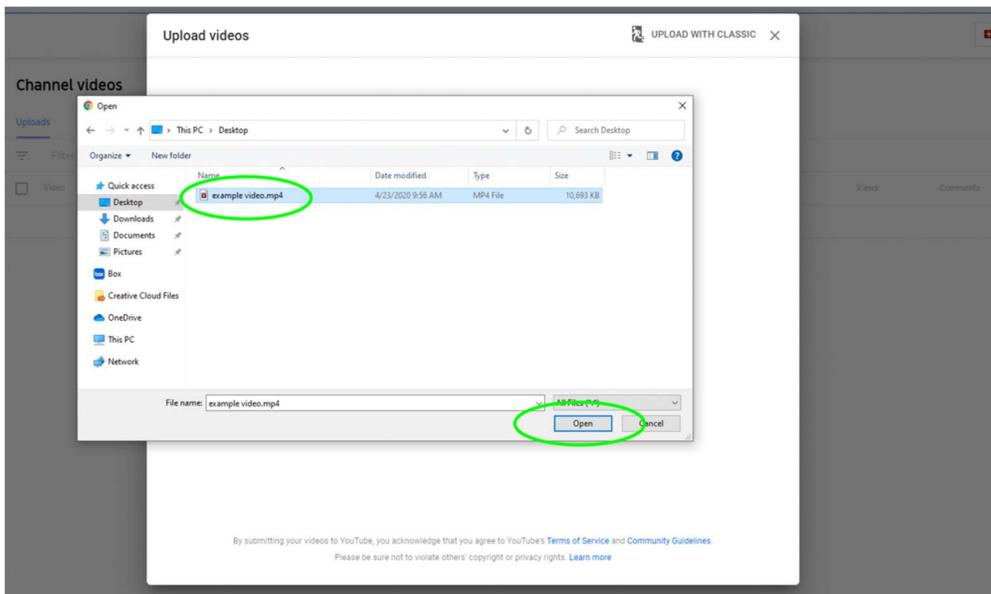

Note: If this is your first time uploading, YouTube may ask you to create a "Channel" for your account. You will have to choose "Get Started" but when it asks you to fill in details, you can select "set up later".

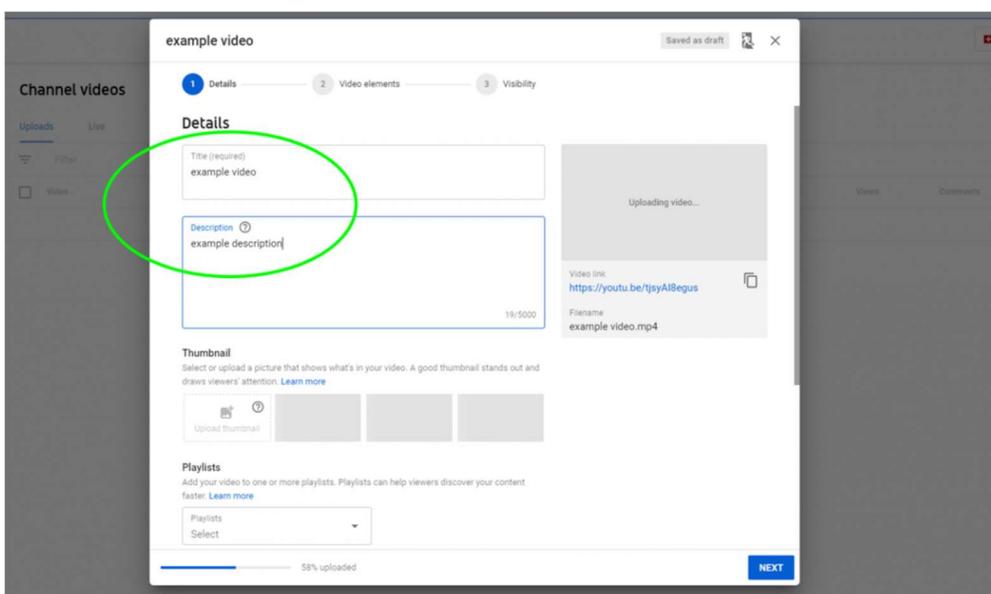

5. On the “Upload videos” window, click “Select Files”.

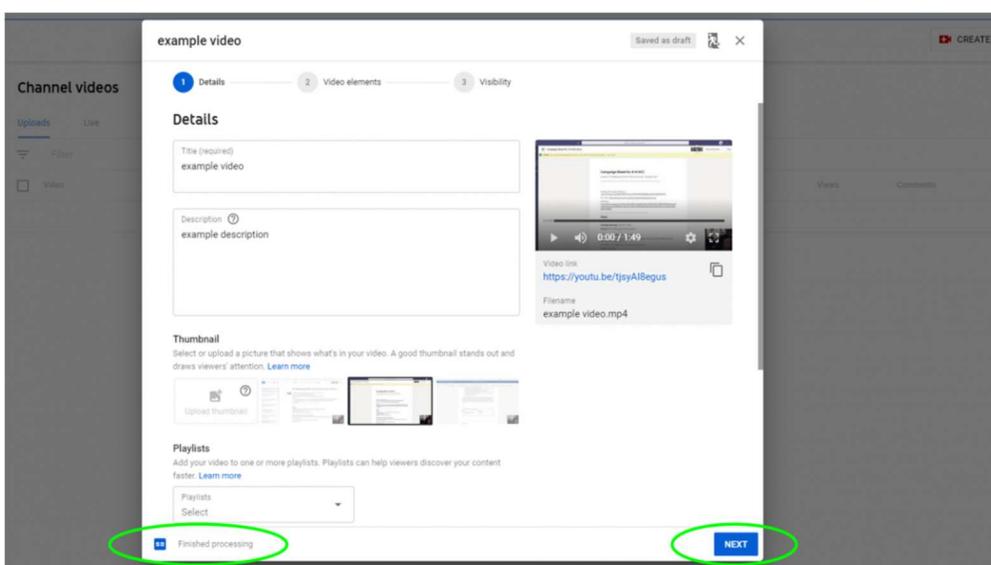

6. Navigate to the video you would like to upload from your computer and click “Open” or “Choose”. Your video will begin uploading.

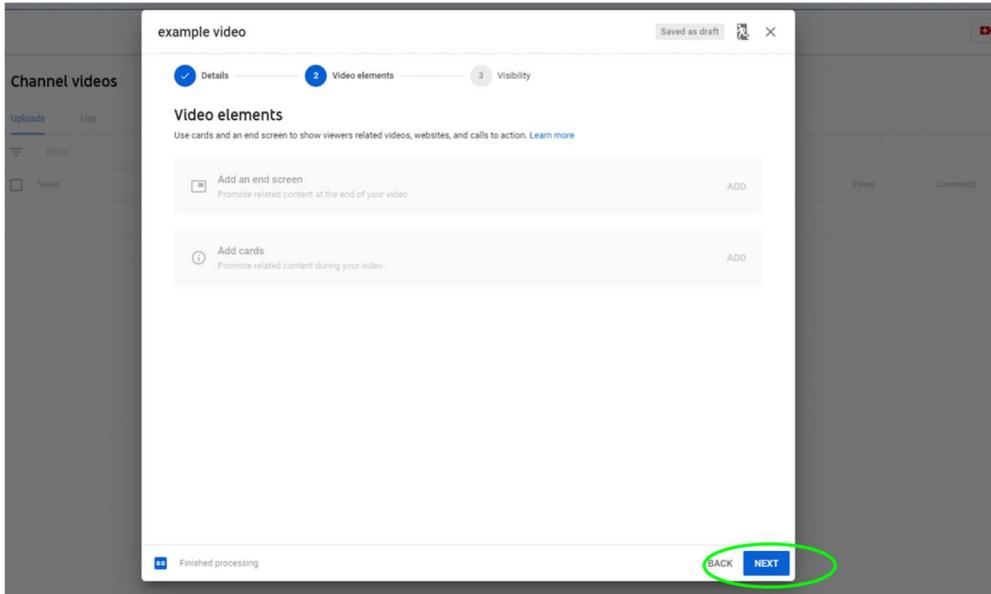

7. As the video is uploading, add a title and description in the “Details” window. Under title, add your name (just first initial and last name is fine) and presentation type (demonstration, public speaking, etc.). If you want, you can also add other information into the “Description” field, such as your presentation subject matter or a summary of your presentation. Scroll under “Audience” select “Yes, it’s made for kids”.

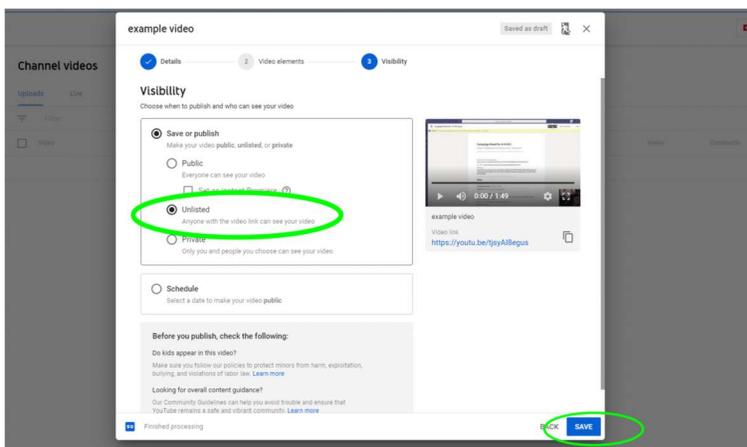

8. When the video upload has finished processing click “Next”.

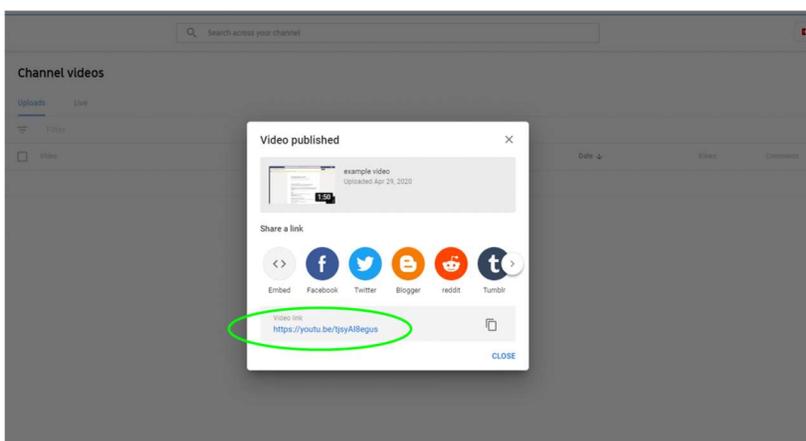

9. There is no need to add anything on the “Video Elements” window. Click “Next”.

10. ****IMPORTANT**** On the “Visibility” window, under “Save or publish”, select “Unlisted” as your privacy setting. Click “Save”.

11. On the “Video published” confirmation window, copy the link provided and paste it somewhere you can find it, such as a Notepad document or an email to yourself. Click “Close”.

12. Paste the link you just copied into your browser and watch your whole video, to make sure that the upload process was successful.

13. This copied link will be the one you share or upload to turn in your project.
